

Dynamization of the process prior to the meeting for the foundation of the Block for Integral Revolution

This document describes the proposal of dynamization prior to the foundation of the Bloc for Integral Revolution. At the same time, it aims at answering many of the doubts raised. It is addressed to these people who have read the [call](#)¹ and are interested in participating in the process.

1. The process

As it is described in the call, before the meeting we will carry on a process of knowledge and discussion. The objective is to get to know each other, to generate a common space at the local level, to discuss the basis to go on towards a common manifesto for the meeting and to prepare the meeting. This process may take as long as is necessary. We propose to carry on it on the basis of local nodes, the participation of people and collectives and the dynamization of the promoter group.

2. The promoter group

Functions of the promoter group until the meeting:

- To spread the call.
- To promote and provide the tools for the local nodes.
- Dinamize the discussion process.
- To manage the web <http://integrarevolucio.net>, the associated emails and the twitter account [@integrarevolucio](#).

Who can participate in the promoter group?

We think that in order to simplify and be more operative it is necessary that the promoter group is formed by people that can meet in person. By now, we are assuming this task from Barcelona. However, if you are interested in collaborating with the spreading or you have some suggestion, please write to us.

The meetings of the promoter group from May onwards will take place the first Tuesday of every month.

The promoter group is opened to people that clearly share the basis of the call.

3. The local nodes

We propose that the participation of people in the local nodes is as individuals. It is expected that nodes and collectives are in contact.

¹ <http://integrarevolucio.net/>
<http://integrarevolucio.net>

Proposal of functions of the local nodes (they can carry one or some of these)

- Spreading the call at the local and regional level.
- Organizing a meeting for the foundation of the node.
- Contacting with local collectives and projects of the area which have affinity with the ideas of Integral Revolution.
- Promoting processes of discussion about the ideas of Integral Revolution at the local level.
- Start the generation of this common framework around the ideas of Integral Revolution in its area.
- Giving the members of the node access to the virtual social network (see the following sections).

How to create a node?

To generate a node the following things are necessary:

- Identifying and contacting collectives and local and regional groups that have affinity with the basis of the call.
- Organizing a meeting with interested collectives and people.
- To inform the promoter group so that it provides you the tools.

4. The language

- We are trying to translate the call to as many languages as possible so that the proposal and its ideas are spread all over the world.
- The language skills of the promoter group are limited. We can only commit to maintain a communication and translation into English, Castilian and Esperanto for the dynamization of the process prior to the meeting.
- We choose Esperanto as neutral language. Due to its limited use, we find essential to use other languages. Due to its wide knowledge and use and to the skills of the promoter group we choose Castilian and English.

About the virtual space of discussion

- To share information between the discussions in the different languages, we propose to do summaries periodically.
- Spaces for new languages can be generated, if it is needed. The minimum requirements to generate a new language sub-group are:
 - A local node or collective has to guarantee it.
 - Translating the proposals of organization of the promoter group or others.
 - Summarizing the debates at least at the set dates (June 30 and then, every 3-6 months).

- Giving access to users that ask it and participate in a local node.

5. Spaces of discussion

The aim is to discuss about the proposed ideas, and to advance in those discussions to be able to define a manifesto for the meeting. The point is to discuss about the fundamental ideas.

Issues of debate:

1. Functioning of the Bloc.
2. Objectives of the Bloc.
3. Ideological basis:
 - Equitable human relations based on freedom.
 - Self-organization and sovereign popular assemblies.
 - The commons, the public.
 - A new economy based in cooperation and proximity.
 - Cooperating with Life and the Natural environment.
 - How can we do this?
4. When, where and how we organize the meeting?

If it is considered that some important matter is not included in the previous issues this will be proposed to a language discussion sub-group, exposing why it should be added. The administrator of the language discussion sub-group, if s/he sees that it is not included in these issues it will create this new one.

Virtual space of discussion

A group (Integra Revolucion) has been created in the social network n-1² to generate a virtual space of discussion. The working functioning of this network is the following:

- Access to the network with invitation.
- There is two type of sub-groups:
 - 1) Territorial organization nodes
 - 2) Spaces for discussion (by languages)
- In order to be allowed to participate in the discussions of the sub-group you have to be accepted in a territorial organization (node) sub-group. In order to have access to a node sub-group, contact with the nearest around you³, or, if there is no one, please write us. If you

2 The link to the group is: https://n-1.cc/g/integra_revolucio. If you have doubts on how to use the social network you can search tutorials in internet, or write us.

3 This map facilitates the contact between people of the same area that want to participate in the creation of the Bloc: <http://integrarevolucio.crowdmap.com>

want to generate a local node, in case there is no one in your region, please write us⁴.

- Language sub-groups with discussions about each one of the proposed issues. Each language sub-group has at least one administrator. To be able to publish in the discussions of a language, you have to ask permission to the administrator of the sub-group.
- To allow the exchange of information between the discussions of the different languages, some dates will be set so the administrators of each language summarize the main deliberations and contributions in its language. It is requested that the administration of each language ensures the translating of the discussions at least into one of these languages: Esperanto, English and Castilian (into all, if it is possible). The administrators of the other languages can translate those summaries and contributions into their own language.
- We define July 30, 2013 as the first moment of sharing this information and later we will define other dates.

Physical spaces of discussion

- Spaces generated by the local nodes with the aim of discussing about the proposed issues and strengthen and enlarging experiences at the local level to start generating a space around Integral Revolution.
- We propose the organization of deliberative spaces, spaces of exchanging of ideas and collective learning spaces (for example, like groups of collective study and reflection).
- We recommend to transfer the conclusions and deliberations from the local space to the virtual space, to share them with the rest of people involved in the process.

6. Others

How to decide the date and the place of the meeting?

There is a lot of work to do before the meeting. We propose that every time that the contents of the virtual spaces of discussion are summarized, the local nodes suggest when they consider that the meeting could be organized and, also, if they have some proposal of places to do it and organize the logistics of the meeting. When various proposals of places are on the table and various nodes consider that the moment to organize the meeting has arrived, we will open a issue of discussion and a evaluation among the nodes to decide the place of the meeting.
